

BOOKER HIGH SCHOOL REBUILD

📍 School Board of Sarasota County | Sarasota, Florida

PROJECT OVERVIEW

The multi-phase reconstruction of the 1,400 student Booker High School Campus included renovations and remodeling of several existing buildings, as well as the re-routing of Orange Avenue and the construction of 4 new buildings. Additional site improvements include new student and staff parking areas and reconstructed athletic fields. The project totaled over 300,000 sq.ft. in improvements. As a new design type that encourages a more collaborative and immersive learning experience, these new science labs are located around a centralized prep lab used also for instruction. In addition, a shared use lecture room is outfitted with wall mounted touch screen monitors for group instruction and interactive learning. All rooms are provided with mobile furniture, quick connect manifolds for air/gas connects so that each room is easily transformed for multiple uses, group study and individual testing.
