

# DUETTE FIRE DISTRICT STATION

📍 Duette, Florida

## PROJECT OVERVIEW

Designed as the new headquarters of the Duette Volunteer Fire Department, the 7,500 sq. ft. station replaces their existing headquarters located nearby. In addition to housing the fleet of fire vehicles, the building also includes office space for District business as well as space to accommodate future growth and conversion to a manned station. The design uses an economical metal building designed to blend into its rural surroundings.
