

IMG MULTISPORT COMPLEX

📍 IMG Academy | Bradenton, Florida

PROJECT OVERVIEW

The 5,000 seat complex features professional quality grass fields, 400-meter track, long throw areas and pole vault and long jump runways. The main playing field, illuminated to televised levels, was specifically designed to accommodate high school football, college and international soccer and lacrosse. A certified rubberized surface track encircles the competition field. Also located at the football field is the fieldhouse and press box. By connecting the grandstands and the press box structure, a weatherproof space is created to serve concessions, retail sales and a generous sports branded gathering space. Removable goal posts allow for maximum field flexibility, the tech-savvy academy considered the flexibility of the event space and requested underground conduit for plug and play connections for timing clocks, communication cabling, concert events, and television camera requirements for major entertainment events.
