

IMG ACADEMY HEALTH SERVICES

📍 IMG Academy | Bradenton, Florida

PROJECT OVERVIEW

The Health Services Clinic located in the IMG Academy Campus Center provides students a full range of 24/7 health services. In addition to the standard services, the facility also offers parent and student counseling, women's health services, physician services and concussion monitoring. The team of nurses distributes prescription medicine for the students at designated times to ensure safe and proper medical treatment. The Health Services Clinic was designed to provide health services in a convenient location adjacent to other amenities. The 'touch free' facility allows students to access the health services without the spread of germs. In addition, the facility's location within the Campus Center allows students to enter through the main building and exit to the outside of the building to reduce the spread of germs. Private ambulance access is also located at the facility.
